SOFT SKILLS

- Problem-solving
- Critical analysis
- Planning & Organization
- Leadership
- Decision-making
- Adaptability
- Objective communication
- Analytical thinking & Proactivity

LANGUAGES

English • Intermediate (B1)

PROFESSIONAL SUMMARY

Full-Stack Web Developer, specializing in Front-End Development, with experience in digital transformation, IT governance, process modernization, and strategic support for public management at the Angra dos Reis City Hall. Capable of analyzing scenarios, proposing technological solutions, coordinating software projects, and integrating systems, applications, and digital platforms.

RESULTS & GENERATED IMPACT

Code Modernization & Version Control

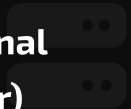

I was the main agent in implementing a versioned programming culture at Angra City Hall (migrating from local, uncontrolled workflows to structured repositories). I was a key player in adopting the MVC pattern using Laravel PHP, actively replacing various legacy .ASP websites and microservices with robust, modern, and scalable solutions.

Versionamento (Git)

Refatoração de Legado

Automation & Operational Efficiency (Public Sector)

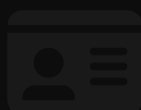

I coordinated the migration of legacy processes to scalable digital platforms at Angra City Hall. The implementation of integrated MVC systems (Laravel) cut bureaucratic bottlenecks, optimized response times between departments, and ensured greater transparency and speed in direct citizen services.

Redução de Custos / Tempo

Governança Digital

Conta Angra & GOV.BR Integrations

I participated directly in the technical coordination of the team during the creation of "Conta Angra" in the municipality. I was responsible for the complex Single

Front-End Engineering & UX/UI Collaboration

I worked as the front-end programmer for most of the municipality's new websites and institutional systems. I work seamlessly in collaboration with

Sign-On (SSO) integration with the GOV.BR platform for the login flow, as well as developing multiple custom modules to meet the vital demands of various city hall departments.

Integração SSO (GOV.BR)

Coordenação Técnica

the development team and the UX/UI Designer, ensuring that prototypes are transformed into responsive, accessible interfaces focused on delivering the best end-user experience.

Front-End Avançado

Tradução UI/UX -> Código

Commercial Solutions & Platforms for Private Sector

Development of web ecosystems for private companies and entrepreneurs, including high-conversion landing pages, administrative panels, and custom content management systems (CMS). The main benefit delivered to these clients is the elimination of dependence on generic third-party software, ensuring reduced operational costs, a direct increase in lead generation and retention, and providing total corporate autonomy over business processes.

Autonomia para Empreendedores

Conversão de Leads e Vendas

Proprietary Digital Products & SaaS

Ideation and end-to-end development of proprietary and marketable digital products (such as Praticalista and Convitonline). These platforms were created to make life easier for event organizers, engaged couples, and debutantes. The process encompasses everything from software engineering to strategic business vision, delivering scalable tools that monetize and solve real pain points in the events market.

PROFESSIONAL EXPERIENCE

Innovation and Security Advisor

Prefeitura de Angra dos Reis

06/2026 – PRESENT

► I provide technical advisory support to the Department of Technology, through the Information Security Superintendency, contributing to initiatives in technological innovation, digital transformation, and administrative modernization.

PDF

► I advise on the planning, analysis, and implementation of strategic projects focused on technological innovation and the continuous improvement of municipal public services.

► I propose and support the implementation of technological solutions for the automation, digitalization, and optimization of institutional processes.

► I work on the technical coordination and monitoring of Information Security and Cybersecurity projects, supporting the implementation of policies, tools, and controls aimed at protecting technological environments.

► I conduct technical studies, assessments, and analyses of new technologies applicable to Public Administration, contributing to strategic decision-making and the evolution of digital governance.

► I prepare technical documentation, opinions, reports, and proposed solutions, supporting projects in innovation, information security, and digital transformation.

Technological Innovation Advisor

Prefeitura de Angra dos Reis

02/2026 – 06/2026

► I provided strategic and advisory support to the Secretariat for Modernization and Personnel Management.

► I analyzed the external environment and prospected technological solutions and trends aligned with public management.

► I proposed and supported the implementation of methodologies, systems, applications, and digital platforms.

► I coordinated integrated digital governance actions, promoting the modernization of processes.

► I prepared technical documentation, reports, and proposed solutions, supporting the management of technological services.

► I provided technical and software development support.

Technical Coordinator for Development

Prefeitura de Angra dos Reis

05/2022 – 02/2026

► I translated designs into clean, functional code and created layouts from scratch, focusing on intuitive UI and excellent UX.

► I developed responsive interfaces using HTML, CSS, Bootstrap, and JavaScript.

► I followed architectural patterns such as MVC using Laravel PHP for efficient API integrations and scalable architecture.

► I oversaw IT contracts.

► I planned, coordinated, and supported development projects, meeting deadlines and requirements.

► I led team activities and implemented solutions to streamline workflows.

PDF

Information Technology Intern

Prefeitura de Angra dos Reis

04/2021 – 05/2022

► I resolved problems and performed hardware maintenance in the Technical Support department.

► I developed front-end solutions using HTML, CSS, and Bootstrap for web systems.

► I assisted with back-end integrations and server-side processes.

Technology Artist: Web Developer, IT Technician, Videomaker, Audiovisual Editor, Musician/Singer, and Voice Actor/Dubber.

Soarinho · Freelance

01/2025 – PRESENT

Under the pseudonym "Soarinho" (@osoarinho), I work as a Technology Artist, passionate about transforming emotions into experiences. As an instrumentalist (cellist, trumpeter, guitarist) and singer, I bring romance and elegance to events and digital platforms. In voice-over and dubbing, my voice brings campaigns, videos, and characters to life with professionalism and versatility. In audiovisual production, I record and edit videos, audios, images, and visual arts. In technology, I work as a systems analyst and web developer, creating custom digital solutions for individuals and companies.

Student Monitor

Prepara Cursos Profissionalizantes

12/2020 – 03/2021

I monitored students at a vocational training institution, with a focus on Computer Science and Information Technology courses.

- ▶ Monitor students in the classroom and ensure engagement.
- ▶ Monitor student performance and progress.
- ▶ Provide guidance and clarification on course content, including practical explanations.
- ▶ Assign and evaluate supplementary activities.
- ▶ Supervise students during assessments and keep the lab environment organized.

Sales Assistant

Angralitoral Passeios

09/2020 – 12/2020

I provided sales assistance to a travel agency in Angra dos Reis.

- ▶ Customer acquisition and relationship management.
- ▶ Customer service and support.
- ▶ Booking boat trips (speedboats, schooners and other vessels).
- ▶ Coordination with tour operators, shipowners and partner companies.

EDUCATION

Estácio

2020 – 2026

Bachelor of Science in Information Systems, Information Technology

The Information Systems degree focuses on technology and management to improve efficiency and decision-making in organizations. It covers IT management, data management, network architecture, and software engineering, with a strong emphasis on organizational processes, planning, and decision support.

Technical Course in Administration

COURSES

Rocketseat

MAY 2022

Open Course - "Specialize" (Intermediate), Web Development

In this course, I gained hands-on experience with the main concepts of web development:

- Asynchronous JavaScript, Promises, and async/await.
- Working with APIs (creating APIs from scratch and consuming existing ones using Fetch and Axios).
- Fundamentals of ReactJS and TypeScript for better object-oriented development and typing.
- Advanced SQL techniques, including JOIN and table manipulation.
- Creating CSS animations and transitions.
- Using GitHub for team collaboration.

Rocketseat

MAY 2022

Open Course - "Fundamentals" (Basic), Web Development

In this course, I deepened my knowledge of the main development concepts and faced practical challenges:

PDF

- Setting up the Development Environment.
- HTML5, CSS3 and JavaScript.
- NodeJS and NodeJS + EJS.
- SQL and Data Structures (arrays, matrices, stacks, queues).
- Object-Oriented Programming (OOP) concepts such as classes, encapsulation, inheritance, polymorphism and abstraction.
- Functional Programming.
- Git and GitHub for version control.
- HTTP protocols.

Rocketseat

MAY 2022 – JUN 2022

Open Course - "Connect" (Beginner), Web Development

In this course, I reviewed fundamental concepts, including:

- Programming Basics.
- Computer, Software, and Hardware.
- Internet, Routers, and Servers.
- Operating Systems.
- Programming Languages.
- Types of Web Applications.

This course provided a solid foundation in programming and technology, covering the basics of hardware vs. software, Internet infrastructure, computational thinking, and different types of web applications.

Cisco Networking Academy

OCT 2021

Open Course - "Cybersecurity Essentials" (Intermediate), Cybersecurity

Through this course, I am prepared to:

- Describe tactics, techniques, and procedures used by cybercriminals.
- Understand the principles of confidentiality, integrity, and availability and their relationship to data states and digital security countermeasures.
- Explain the purpose of cybersecurity laws.
- Describe technologies, products, and procedures used to protect confidentiality, ensure integrity, and provide high availability.
- Explain how cybersecurity professionals use technologies, processes, and procedures to defend network components.

Fundação Bradesco

AUG 2020

Open Course - "Adminstrating Databases" (Advanced), Database

In this course, I saw an introduction to how to administer a database and, in this way, be able to effectively manage the activities inherent to this role. In addition, I learned about the concepts that are part of the day-to-day life of a database administrator, data models, SQL, schemas, instances, tables and the entire fascinating universe that involves databases! I understood the differences between the various professionals who work in activities related to database management, as well as which types are most commonly used and suitable for companies of any size.

Fundação Bradesco

Open Course - "Implementing a Database" (Intermediate), Database

JUL 2020

PDF

In this course, I saw an introduction to database implementation, understanding its particularities, such as the use of SQL Server. I learned some terminology that is applied in the implementation of a database and the necessary step-by-step process for its implementation, so that I can put this indexed set of information into practice. The topics covered in this course range from notions of data modeling techniques (with emphasis on relational databases) to conceptual, logical and physical aspects of a database.

Fundação Bradesco

Open Course - "Data Modeling" (Beginner), Database

JUN 2020 - JUL 2020

This course covered in more detail how to perform data modeling and which techniques are involved, including an introduction to databases and some topics, such as relational theory, normalization, self-relationship, cardinality, mini-world, abstraction, among other concepts.
